# **IdeaTop. The professional range of trolleys close to the needs of the operators.**

IdeaTop line is designed to simplify the daily tasks  
of the operators.

The loading space is structured so that all the  
necessary tools are always at hand.

The result is a line of trolleys extremely efficient and  
comfortable, especially designed for those who look  
for the best quality.

## **Engineering, design and ergonomics: three concepts at the base of IdeaTop 6.**

IdeaTop 6 is the result of an innovative study carried  
out by VDM in order to realize a unique trolley.

The ergonomic design offers practical advantages  
facilitating the operator's tasks: from the lifted up  
wringer support to an excellent maneuverability.

Assembly is another strong point: IdeaTop 6 can be  
assembled very quickly; moreover all parts can be  
replaced very easily and also the change  
of configuration of the trolley is rapid.

# Unequalled loading capacity.

IdeaTop 6 is the top: it offers a great space in a small size.

## Features of the bag-holder

- 2 integrated rubber handle-holders
- 4 hooks for accessories
- Plastic device for waste collection separation

## Bent vertical frame

- It allows a bigger loading capacity

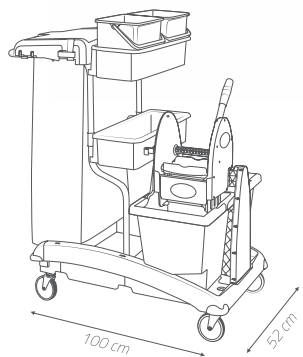

# Maximum strength.

All the parts of the trolley are **designed to ensure a maximum resistance to breakage and deformation**, maintaining **constant performances over time**.

## Dimensions

### BAG-HOLDER

- It is directly fixed on the steel frame
- No need for additional plastic supports
- 2 integrated rubber handle-holders
- 4 hooks for accessories

### WRINGER SUPPORT

- Made of polypropylene reinforced with fiberglass
- Alveolar structure
- Resistant to chemicals

### VERTICAL FRAME

- Steel tube thickness 1.5 mm
- Anti-scratch epoxy painting

### BASE

- Arch framework
- High strength polypropylene copolymer
- Alveolar reinforcements
- Single-piece
- Brass bushes for fixing the wheels
